

Challenge 06 - Git & Flex

For this week's challenge, you'll need to create a gallery website full of images, using Flex. Refer to the *screenshots & video* folders to see the exact look of the page.

The menu on the left should be fixed. And every image is a link.

When the page is open in responsive mode (mobile and tablete), the sidebar menu should be switched to a hamburger menu.

Evaluation system:

1 point - Whole page completed in HTML & CSS

3 points - Add all the hover effects.

5 points - The page should be responsive to mobile and tablet devices.

Deadline:

1 week after its presentation, 23:59h end of the day.

Hints:

- Use Flex to avoid any pain in positioning the elements.

Note:

- Bootstrap is optional for this challenge.
- This challenge and all the next ones need to be sent on GitLab.
