

# Challenge 07 - Bootstrap

For this week's challenge, you'll need to create a fully responsive page using **bootstrap**. Refer to the *screenshots & video* folders to see the exact look of the page.

The navbar is fixed to the top and must open the navbar links when clicked on the hamburger menu, on mobile.

The image shows a mobile application interface. At the top, there is a dark grey header with the word "BLOGGER" in white. To the right of the header is a hamburger menu icon. Below the header, there is a list of links: "Home", "Explore", "Create", and "Share". The main content area features a purple sign-up form with the title "Sign Up Today" and the instruction "Please fill out this form to register". The form contains four input fields: "Username", "Email", "Password", and "Confirm Password". At the bottom of the form is a "Submit" button. The background of the app is a dark, blurred image of a person.

There is a plus functionality that you will have as a challenge to make, and that is the **scrollspy**. What this does is: when you scroll the page, the links in the navbar get highlighted.

---

## Evaluation system:

**1 point** - Whole page completed in HTML & CSS.

**3 points** - All of the above + responsive for tablet & mobile.

**5 points** - All of the above + make the **hamburger work** + make the **scrollspy work**.

## Deadline:

**1 week after its presentation, 23:59h end of the day.**

## Hints:

- Read about scrollspy and how it works.

## Note:

- Bootstrap is a **must** for this challenge.
